Index of Subjects in Volume XLIX

Acute
  inflammation, leukocytes, 1185
  renal failure, fibrinogen deposition, 383
adenosine triphosphatase, obstructive jaundice, 605
aflatoxin B_1
  hepatic changes, 113
  injury, liver, 1023
alcohol ingestion, liver cell, 593
allergic encephalomyelitis, electron microscopy, 537
allograft, skin, cattle, 1125
Alzheimer's disease, 1157
amyloidosis
  experimental, 657, 911
  experimental, chick, 1103
antigen
  protein, amyloid induction, chick, 1103
  tritiated, lymph node localization, 889
arteriolar constriction, experimental hypertension, 53
arteriolonecrosis, cerebral arterioles, 365
arthritis, rheumatoid, synovial giant cells, 931
athero-arteriosclerosis, calcific, nicotine, 739
atrophy, denervation, 33
autograft, skin, cattle, 1125
axonal degeneration, myelin sheaths, 1139

Bacterial and viral infection, Hemophilus and influenza virus, 353
brain
  arterioles, experimental hypertension, 53
  arteriolonecrosis, 365
  porcine polioencephalomyelitis, 325
breast carcinoma, myoepithelial cells, 301
bursectomy, bursa of Fabricus, chick, amyloid induction, 1103

Calcific athero-arteriosclerosis, nicotine, 739
canine mastocytoma, 501
"caps", nucleolar, ultraviolet irradiation, 555
carbon tetrachloride
  effect on liver, 239
  poisoning, hepatic circulation, 1069
carcinoma, breast, myoepithelial cells, 301
cattle, skin grafts, 1125
cerebellar "hypoplasia", rat virus, 457
cerebral arterioles
  arteriolonecrosis, 365
  experimental hypertension, 53
cholecystitis, guinea pig, opium, 491
cholesterol, arteriosclerosis, 739
chronic liver injury, immunologic reactions, 1087
circulation, liver, carbon tetrachloride, 1069
cirrhosis
  clay pipestem, schistosomiasis, 477
  immunologic reaction, 1087
  lasiocarpine, 129
  rats, lipotropic diet, 841
clay pipestem cirrhosis, schistosomiasis, 477
clumping activity, effect of osmolality, 1185
collagen
  formation, intracytoplasmic, 515
  necrosis, mastocytoma, 501
compensatory renal enlargement, 1
congenital infection, rat virus, 457
cretinism, endemic, muscle, 193
cytomegalovirus hepatitis, mouse, 871
cytoplasmic
  alterations, liver regeneration, 227
  granules, juxtaglomerular cells, 955

Dementia, progressive, 77
denervation atrophy, muscle, 33
desmoid fibromatosis, intracytoplasmic collagen, 515
diet, lipotropic, rat cirrhosis, 841
dl-ethionine, rat testis, 981
dog, mastocytoma, 501

Electron microscopy
  allergic encephalomyelitis, 537
  denervation atrophy, 33
  desmoid, 515
  ischemic muscle, 569
  juxtaglomerular cells, 679, 955
  kidney, tannic acid, 15
  lipidosis, liver, 203
  liver, adenosine triphosphatase, 605
  liver, carbon tetrachloride, 239
  liver, ethanol ingestion, 593
  liver, $FeSO_4$ damage, 1053
  liver, runt disease, 257
  myelin sheaths, 1139
  partial hepatectomy, 825
  porcine encephalomyelitis, 325
  progressive dementia, 77
  reovirus viremia, 1171
  S-91 mouse melanomas, 309
encephalomyelitis
  allergic, electron microscopy, 537
  porcine, electron microscopy, 325

endemic cretinism, skeletal muscle, 193
ethanol ingestion, liver cell, 593
ethionine, rat testis, 981
experimental hypertension
cerebral arterioles, 53
glomerular alterations, 773

Ferrous sulfate damage, liver, 1053
fibrinogen deposition, renal failure, 383
fibromatosis, desmoid, intracytoplasmic collagen, 515
flying spot ultraviolet irradiation, 555
folic acid, tropical sprue, 167
fowlpox (turkey origin), inclusion body, 723

Gallbladder, cholecystitis, opium, 491
generalized glycogen storage disease, liver, 99
giant cells, synovial, rheumatoid arthritis, 931
glomerular alterations, experimental hypertension, 773
glycogen storage disease, liver, 99
grafts, skin, cattle, 1125
granules, cytoplasmic, juxtaglomerular cells, 955
granulomas, spermatic, testis, ethionine-treated, 981
guinea pig, cholecystitis, opium, 491

H-1 virus hepatitis, partial hepatectomy, 795
hamster
embryo cells, SV_{40} effect, 397
homotransplantable lymphomas, 637
Hemophilus influenzae **and influenza virus**, combined infection, 353
hepatectomy, partial
H-1 virus hepatitis, 795
regeneration, 825
hepatic
changes, aflatoxin B_1, 113
microcirculation, carbon tetrachloride, 1069
hepatitis
cytomegalovirus, mouse, 871
H-1 virus, partial hepatectomy, 795
lasiocarpine, 129
spontaneous, rat virus, 457
hepatocytes, alcohol ingestion, 593
hepatoxicity, carbon tetrachloride, 239
heterologous serum, cirrhosis, 1087
histochemical studies, progressive dementia, 77
histochemistry, lipidosis, liver, 203
homotransplantable lymphomas, hamster, 637
howler monkey, pigmentary liver disease, 445
human
juxtaglomerular cells, granules, 955
leukocytes, acute inflammation, 1185
hyperplasia, renal, compensatory, 1
hypertension
cerebral arteriolonecrosis, 365
experimental, cerebral arterioles, 53
experimental, glomerular alterations, 773
hypertrophy, renal, compensatory, 1
hypoplasia, cerebellar, rat virus, 457

Immune deposit disease, serum sickness nephritis, 997
immunofluorescence, reovirus viremia, 1171
immunologic reaction, chronic liver injury, 1087
inclusion body formation, fowlpox, 723
inflammation, acute, leukocytes, 1185
influenza virus and *Hemophilus influenzae*, combined infection, 353
injury, liver, aflatoxin, 1023
intracytoplasmic collagen formation, 515
irradiation, ultraviolet, nucleus, 555
ischemia, striated muscle, 569
isograft, skin, cattle, 1125

Jaundice, obstructive, adenosine triphosphatase, 605
jejunum, tropical sprue, 167
juxtaglomerular cells, granules, 955

Kidney
compensatory enlargement, 1
failure, fibrinogen deposition, 383
glomerular alterations, experimental hypertension, 773
juxtaglomerular cells, 679
tannic acid administration, 15

Lasiocarpine, hepatitis, rat, 129
leukocytes, acute inflammation, 1185
lipidosis, liver, 203
lipotropic diet, rat cirrhosis, 841
liver
adenosine triphosphatase, obstructive jaundice, 605
aflatoxin B_1, 113
carbon tetrachloride poisoning, 239, 1069
cytomegalovirus hepatitis, mouse, 871
$FeSO_4$ damage, 1053
glycogen storage disease, 99
mouse, runt disease, 257
lipidosis, 203
pigmentary disease, howler monkey, 445
regeneration, 227
liver cell, alcohol ingestion, 593
liver injury
aflatoxin, 1023
immunologic reaction, 1087

liver regeneration, partial hepatectomy, 825
localization, tritiated antigen, lymph node, 889
lymph node
antigen localization, 889
response, transplantable lymphomas, 637
lymphocyte depletion, in amyloidosis, 911
lymphomas, homotransplant, hamster, 637

Mammalian liver, regeneration, 227
mammary gland, carcinoma, myoepithelial cells, 301
mastocytoma, collagen necrosis, 501
melanomas, mouse, dieting restriction, 309
membranes, denervation atrophy, 33
metastasis, transplantable lymphomas, 637
microcirculation, liver, carbon tetrachloride, 1069
mitosis, liver regeneration, 227
monkey
howler, pigmentary liver disease, 445
liver, aflatoxin injury, 1023
rhesus, protein deficient, 419
mouse
chronic schistosomiasis, 477
cytomegalovirus hepatitis, 871
liver, runt disease, 257
melanomas, S-91, dieting restriction, 309
newborn, reovirus viremia, 1171
muscle
denervation atrophy, 33
skeletal, cretinism, 193
striated, ischemia, 569
myelin sheaths, axonal degeneration, 1139
myoepithelial cells, breast carcinoma, 301

Necrosis, collagen, mastocytoma, 501
neoplasms, induced by SV_{40} transformed cells, 397
nephritis, serum sickness, rabbit, 997
newborn mouse, reovirus viremia, 1171
nicotine, arteriosclerosis, 739
nuclear irradiation, ultraviolet, 555
nucleolar "caps", ultraviolet irradiation, 555

Opium, cholecystitis, 491
osmolality, effect on leukocytes, 1185

Partial hepatectomy
H-1 virus hepatitis, 795
regeneration, 825
phagocytic activity, effect of osmolality, 1185
phenylalanine and tyrosine restriction, mouse melanomas, 309
pig, swine pox lesion, skin, 339
pigmentary liver disease, howler monkey, 445
pneumonia, pine pollen, 153
poisoning, carbon tetrachloride, hepatic circulation, 1069
polioencephalomyelitis, porcine, electron microscopy, 325
pollen, pine, pneumonia, 153
porcine polioencephalomyelitis, electron microscopy, 325
progressive dementia, electron microscopy, 77
protein
antigen, amyloid induction, chick, 1103
deficiency, monkey, 419

Rabbit, serum sickness nephritis, 997
rat
amyloidosis, 657
axonal degeneration, spinal cord, 1139
cirrhosis, lipotropic diet, 841
H-1 virus hepatitis, 795
lasiocarpine hepatitis, 129
pine pollen pneumonia, 153
suckling, virus infection, 457
testis, ethionine-treated, 981
rat liver
aflatoxin injury, 1023
aflatoxin B_1, 113
carbon tetrachloride, 1069
regeneration
liver, partial hepatectomy, 825
mammalian liver, 227
testis, ethionine-treated, 981
renal glomerular alterations, experimental hypertension, 773
rhesus monkey, protein deficient, 419
renal
alterations, tannic acid administration, 15
enlargement, compensatory, 1
failure, fibrinogen deposition, 383
reovirus viremia, newborn mice, 1171
restriction, tyrosine and phenylalanine, mouse melanomas, 309
reticulin, relation to amyloid, 657
rheumatoid arthritis, synovial giant cells, 931
runt (transplantation) disease, liver, mouse, 257

Schistosomiasis mansoni, cirrhosis, 477
Senecio alkaloid, hepatitis, 129
serum sickness nephritis, rabbit, 997
skeletal muscle, cretinism, 193
skin
grafts, cattle, 1125
swine pox, 339
spermatic granulomas, testis, ethionine treatment, 981
spinal cord, axonal degeneration, 1139
spontaneous hepatitis, rat virus, 457
sprue, tropical, jejunum, 167
starvation, effect on hepatoxicity of carbon tetrachloride, 239

striated muscle, human, ischemia, 569
SV_{40}, *in vitro* effect, hamster embryo cells, 397
swine pox, skin, swine, 339
synovial giant cells, rheumatoid arthritis, 931

Tannic acid, renal alterations, 15
testis, rat, ethionine-treated, 981
thymectomy, chick, amyloid induction, 1103
thymic atrophy, in amyloidosis, 911
thromboarteritis, nicotine, 739
transplantable lymphomas, hamster, 637
transplantation (runt) disease, liver, mouse, 257
tritiated antigen, localization of lymph node, 889
tropical sprue, jejunum, 167
turkey fowlpox, inclusion body, 723
tyrosine and phenylalanine restriction, mouse melanomas, 309

Ultraviolet irradiation, nucleus, 555

Viremia, reovirus, newborn mice, 1171
virus
assay, reovirus viremia, 1171
bacterial infection, Hemophilus and influenza virus, 353
hepatitis, cytomegalovirus, 871
hepatitis, H-1, partial hepatectomy, 795
rat, hepatitis, cerebellar "hypoplasia", 457
vitamin B_{12}, tropical sprue, 167
vitamin D, arteriosclerosis, 739

Index of Authors in Volume XLIX

Adams, D. O. Experimental pine pollen granulomatous pneumonia in the rat. (July) 153
Allison, F., Jr. See Lancaster and Allison. (December) 1185
Al-Talib, A. M. See Buddingh, Al-Talib and Pipes. (August) 353
Arakawa, K.; Jezéquél, A-M.; Macvie, S. I.; Johnston, R.; Perz, Z. M., and Steiner, J. W. The liver in murine transplantation (runt) disease. Observations of the acute lesions by light and electron microscopy. (August) 257
Arhelger, R. B. See Boler, Broom and Arhelger. (July) 15
Bartók, I. See Virágh and Bartók. (November) 825
Bayless, T. M. See Swanson, Wheby and Bayless. (July) 167
Becker, F. F., and Lane, B. P. Regeneration of the mammalian liver. IV. Evidence on the role of cytoplasmic alterations in preparation for mitosis. (August) 227
Ben-Ishay, Z.; Spiro, D., and Wiener, J. The cellular pathology of experimental hypertension. III. Glomerular alterations. (October) 773
Benson, W. R., and Clare, F. S. Regenerative changes and spermatic granulomas in the rat testis after treatment with DL-ethionine. (November) 981
Bentinck, D. C. See Jenson, Rabin, Bentinck and Rapp. (December) 1171
Biava, C. G., and West, M. Fine structure of normal human juxtaglomerular cells. I. General structure and intercellular relationships. (October) 679
———, and ———. Fine structure of normal human juxtaglomerular cells. II. Specific and nonspecific cytoplasmic granules. (November) 955
Boehme, D.; Themann, H., and Gold, J. Structural and ultrastructural changes in striated human muscle caused by chronic ischemia. (September) 569
Boler, R. K.; Broom, J. S., and Arhelger, R. B. Ultrastructural renal alterations following tannic acid administration to rabbits. (July) 15
Brecher, G. See Chanana, Brecher and Cronkite. (December) 1125
Broom, J. S. See Boler, Broom and Arhelger. (July) 15
Buddingh, G. J.; Al-Talib, A. M., and Pipes, F. J. Combined viral and bacterial infection. An *in vitro* analysis of the population dynamics and factors influencing the enhancement of virulence of *Hemophilus influenzae* in combined infection with influenza virus in embryonated eggs. (August) 353
Butler, W. H. Early hepatic parenchymal changes induced in the rat by aflatoxin B_1. (July) 113
Carter, R. L., and Gershon, R. K. Studies on homotransplantable lymphomas in hamsters. I. Histologic responses in lymphoid tissues and their relationship to metastasis. (October) 637
Chanana, A. D.; Brecher, G., and Cronkite, E. P. Histologic observations on skin autografts, isografts and allografts in cattle. (December) 1125
Cheville, N. F. The cytopathology of swine pox in the skin of swine. (August) 339
———. Cytopathologic changes in fowlpox (turkey origin) inclusion body formation. (October) 723
Clare, F. S. See Benson and Clare. (November) 981
Cook, J. E. See Montgomery, Reynolds and Cook. (September) 555
Cressman, M. R. See Lampert and Cressman. (December) 1139
Cronkite, E. P. See Chanana, Brecher and Cronkite. (December) 1125
Demopoulos, H. See Mitamura, Yuen, Duke and Demopoulos. (August) 309
Denny-Brown, D. See Rodda and Denny-Brown. (July) 53
———. See Rodda and Denny-Brown. (August) 365
Depaoli, J. R. See Maruffo, Malinow, Depaoli and Katz. (September) 445
Diamandopoulos, G. Th., and Enders, J. F. Comparison of the cytomorphologic characteristics of *in vitro* SV_{40}-transformed hamster embryo cells with the histologic features of the neoplasms which they induce in the homologous host. (September) 397
Druet, R. L., and Janigan, D. T. Experimental amyloidosis. Rates of induction, lymphocyte depletion and thymic atrophy. (November) 911
———, and ———. Experimental amyloidosis. Amyloid induction with a soluble protein antigen in intact, bursectomized and thymectomized chickens. (December) 1103

Duke, P. S. See Mitamura, Yuen, Duke and Demopoulos. (August) 309
Enders, J. F. See Diamandopoulos and Enders. (September) 397
Epstein, M. A. See Wills and Epstein. (October) 605
Field, E. J., and Raine, C. S. Experimental allergic encephalomyelitis. An electron microscopic study. (September) 537
Fierro-Benitéz, R. See Vickery, Fierro-Benitéz and Kakulas. (July) 193
Fish, A. J.; Michael, A. F.; Vernier, R. L., and Good, R. A. Acute serum sickness nephritis in the rabbit. An immune deposit disease. (December) 997
Gehrke, J. See Henson, Smith and Gehrke. (November) 871
Gershon, R. K. See Carter and Gershon. (October) 637
Gold, J. See Boehme, Themann and Gold. (September) 569
Goldstein, H. B. Cholecystitis in guinea pigs following opium. (September) 491
Good, R. A. See Fish, Michael, Vernier and Good. (December) 997
Grady, H. J. See Racela, Grady, Higginson and Svoboda. (September) 419
———. See Svoboda, Grady and Higginson. (December) 1023
Grimley, P. M., and Sokoloff, L. Synovial giant cells in rheumatoid arthritis. (November) 931
Hartroft, W. S. See Takada, Porta and Hartroft. (November) 841
Hass, G. M.; Landerholm, W., and Hemmens, A. Production of calcific atherosclerosis and thromboarteritis with nicotine, vitamin D and dietary cholesterol. (October) 739
Hase, T. Hepatic microcirculatory changes in acute and chronic carbon tetrachloride poisoning in rats. (December) 1069
Hemmens, A. See Hass, Landerholm and Hemmens. (October) 739
Henson, D.; Smith, R. D., and Gehrke, J. Non-fatal mouse cytomegalovirus hepatitis. Combined morphologic, virologic and immunologic observations. (November) 871
Higginson, J. See Racela, Grady, Higginson and Svoboda. (September) 419
———. See Svoboda, Grady and Higginson. (December) 1023
Holman, J. E. See Koestner, Kasza and Holman. (August) 325
Hottendorf, G. H., and Nielsen, S. W. Collagen necrosis in canine mastocytomas. (September) 501
Janigan, D. T. Experimental amyloidosis. Structural relationships of amyloid and reticulin in tissue sections and isolated preparations. (October) 657
———. See Druet and Janigan. (November) 911
Jenson, A. B.; Rabin, E. R.; Bentinck, D. C., and Rapp, F. Reovirus viremia in newborn mice. An electron microscopic, immunofluorescent and virus assay study. (December) 1171
Jézéquel, A-M. See Arakawa, Jézéquel, Macvie, Johnston, Perz and Steiner. (August) 257
Johnson, H. A., and Vera Roman, J. M. Compensatory renal enlargement. Hypertrophy versus hyperplasia. (July) 1
Johnston, R. See Arakawa, Jézéquel, Macvie, Johnston, Perz and Steiner. (August) 257
Kakulas, B. A. See Vickery, Fierro-Benitéz and Kakulas. (July) 193
Kallenbach, E. See Sarkar and Kallenbach. (August) 301
Kasza, L. See Koestner, Kasza and Holman. (August) 325
Katz, S. See Maruffo, Malinow, Depaoli and Katz. (September) 445
Kilham, L., and Margolis, G. Spontaneous hepatitis and cerebellar "hypoplasia" in suckling rats due to congenital infections with rat virus. (September) 457
———. See Ruffolo, Margolis and Kilham. (November) 795
Klatskin, G. See Nolan, Scheig and Klatskin. (July) 129
Koestner, A.; Kasza, L., and Holman, J. E. Electron microscopic evaluation of the pathogenesis of porcine polioencephalomyelitis. (August) 325
Koffler, D., and Paronetto, F. Fibrinogen deposition in acute renal failure. (August) 383
Krishnan, N., and Stenger, R. J. Effects of starvation on the hepatoxicity of carbon tetrachloride. A light and electron microscopic study. (August) 239
Lampert, P. W., and Cressman, M. R. Fine-structural changes of myelin sheaths after axonal degeneration in the spinal cord of rats. (December) 1139
Lancaster, M. G., and Allison, F., Jr. Studies on the pathogenesis of acute in-

flammation. VII. The influence of osmolality upon the phagocytic and clumping activity by human leukocytes. (December) 1185
Landerholm, W. See Hass, Landerholm and Hemmens. (October) 739
Lane, B. P., and Lieber, C. S. Ultrastructural alterations in human hepatocytes following ingestion of ethanol with adequate diets. (October) 593
———. See Becker and Lane. (August) 227
Lieber, C. S. See Lane and Lieber. (October) 593
Macvie, S. I. See Arakawa, Jézéquel, Macvie, Johnston, Perz and Steiner. (August) 257
Malinow, M. R. See Maruffo, Malinow, Depaoli and Katz. (September) 445
Margolis, G. See Kilham and Margolis. (September) 457
———. See Ruffolo, Margolis and Kilham. (November) 795
Maruffo, C. A.; Malinow, M. R.; Depaoli, J. R., and Katz, S. Pigmentary liver disease in howler monkeys. (September) 445
McAdams, A. J., and Wilson, H. E. The liver in generalized glycogen storage disease. Light microscopic observations. (July) 99
Michael, A. F. See Fish, Michael, Vernier and Good. (December) 997
Mitamura, A.; Yuen, T.; Duke, P. S., and Demopoulos, H. Ultrastructure of S-91 mouse melanomas subjected to phenylalanine and tyrosine restriction *in vivo*. (August) 309
Montgomery, P. O'B.; Reynolds, R. C., and Cook, J. E. Nucleolar "caps" induced by flying spot ultraviolet nuclear irradiation. (September) 555
Nielsen, S. W. See Hottendorf and Nielsen. (September) 501
Nolan, J. P.; Scheig, R. L., and Klatskin, G. Delayed hepatitis and cirrhosis in weanling rats following a single small dose of the Senecio alkaloid, lasiocarpine. (July) 129
Paronetto, F., and Popper, H. Chronic liver injury induced by immunologic reactions. Cirrhosis following immunization with heterologous sera. (December) ... 1087
———. See Koffler and Paronetto. (August) 383
Perz, Z. M. See Arakawa, Jézéquel, Macvie, Johnston, Perz and Steiner. (August). 257
Pipes, F. J. See Buddingh, Al-Talib and Pipes. (August) 353
Popper, H. See Paronetto and Popper. (December) 1087
Porta, E. A. See Takada, Porta and Hartroft. (November) 841
Rabin, E. R. See Jenson, Rabin, Bentinck and Rapp. (December) 1171
Racela, A. S.; Grady, H. J.; Higginson, J., and Svoboda, D. J. Protein deficiency in rhesus monkeys. (September) 419
Raine, C. S. See Field and Raine. (September) 537
Rapp, F. See Jenson, Rabin, Bentinck and Rapp. (December) 1171
Reynolds, R. C. See Montgomery, Reynolds and Cook (September) 555
Roberts, A. N. Cellular localization and quantitation of tritiated antigen in mouse lymph nodes during early primary immune response. (November) 889
Rodda, R., and Denny-Brown, D. The cerebral arterioles in experimental hypertension. I. The nature of arteriolar constriction and its effects on the collateral circulation. (July) 53
———, and ———. The cerebral arterioles in experimental hypertension. II. The development of arteriolonecrosis. (August) 365
Ruffolo, P. R.; Margolis, G., and Kilham, L. The induction of hepatitis by prior partial hepatectomy in resistant adult rats injected with H-1 virus. Light and electron microscopy and virologic studies. (November) 795
Sarkar, K., and Kallenbach, E. Myoepithelial cells in carcinoma of human breast. (August) 301
Scheig, R. L. See Nolan, Scheig and Klatskin. (July) 129
Schrodt, G. R., and Walker, S. M. Ultrastructure of membranes in denervation atrophy. (July) 33
Smith, R. D. See Henson, Smith and Gehrke. (November) 871
Sokoloff, L. See Grimley and Sokoloff. (November) 931
Spiro, D. See Ben-Ishay, Spiro and Wiener. (October) 773
Steiner, J. W. See Arakawa, Jézéquel, Macvie, Johnston, Perz and Steiner. (August) 257
Stenger, R. J. See Krishnan and Stenger. (August) 239
Svoboda, D.; Grady, H., and Higginson, J. Aflatoxin B_1 injury in rat and monkey liver. (December) .....
———. See Racela, Grady, Higginson and Svoboda. (September) 419

Swanson, V. L.; Wheby, M. S., and Bayless, T. M. Morphologic effects of folic acid and vitamin B_{12} on the jejunal lesion of tropical sprue. (July) 167
Takada, A.; Porta, E. A., and Hartroft, W. S. Correlation of structural and functional recovery from cirrhosis in rats treated with lipotropic diets. (November) 841
Themann, H. See Boehme, Themann and Gold. (September) 569
Torack, R. M. Ultrastructure and histochemical studies in a case of progressive dementia and its relationship to protein metabolism. (July) 77
Vera Roman, J. M. See Johnson and Vera Roman. (July) 1
Vernier, R. L. See Fish, Michael, Vernier and Good. (December) 997
Vickery, A. L., Jr.; Fierro-Benitéz, R., and Kakulas, B. A. Skeletal muscle structure in endemic cretinism. (July) 193
Virágh, S., and Bartók, I. An electron microscopic study of the regeneration of the liver following partial hepatectomy. (November) 825
Volk, B. W., and Wallace, B. J. The liver in lipidosis. An electron microscopic and histochemical study. (August) 203
Walker, S. M. See Schrodt and Walker. (July) 33
Wallace, B. J. See Volk and Wallace. (August) 203
Warren, K. S. The pathogenesis of "clay-pipe stem cirrhosis" in mice with chronic schistosomiasis mansoni, with a note on the longevity of the schistosomes. (September) 477
Welsh, R. A. Intracytoplasmic collagen formations in desmoid fibromatosis. (September) 515
West, M. See Biava and West. (October) 679
———. See Biava and West. (November) 955
Wheby, M. S. See Swanson, Wheby and Bayless. (July) 167
Wiener, J. See Ben-Ishay, Spiro and Wiener. (October) 773
Wills, E. J., and Epstein, M. A. Subcellular changes in surface adenosine triphosphatase activity of human liver in extrahepatic obstructive jaundice. (October) 605
Wilson, H. E. See McAdams and Wilson. (July) 99
Witzleben, C. L. An electron microscopic study of ferrous sulphate induced liver damage. (December) 1053
Woodard, J. S. Alzheimer's disease in late adult life. (December) 1157
Yuen, T. See Mitamura, Yuen, Duke and Demopoulos. (August) 309
